OTTO MAURICIO ZÚÑIGA ARGUEDAS

AI Engineer | Lead Software Engineer | Python, Java, React

Costa Rica | Remote (US time zones) | +506 8894-2873 | otto@ottozuniga.com | linkedin.com/in/ottozuniga

PROFESSIONAL SUMMARY

AI-focused Software Engineer with extensive experience in software engineering, full-stack development, and technical leadership. Specializes in AI agent workflows and AI-assisted software development, leveraging Claude Code and agentic development practices to plan, implement, test, and maintain software. Strong programming background in Python, Java, and TypeScript, with expertise in backend engineering, API integrations, cloud infrastructure, and production systems. Experienced in software architecture, technical mentorship, and leading engineering initiatives supporting large-scale integrations.

TECHNICAL SKILLS

AI Engineering & Agentic Development: Claude Code, AI-assisted software development, agent workflows, subagents, Anthropic Claude API, MCP servers, FastMCP

Programming Languages: Python, Java, TypeScript, JavaScript

Backend Engineering: Django, Django REST Framework, FastAPI, Celery, Celery Beat

Frontend Engineering: React, Next.js, Material UI, Tailwind CSS, SWR

APIs & Integrations: REST APIs, GraphQL, OpenAPI/Swagger, unified API integrations

Databases & Messaging: PostgreSQL, Redis, RabbitMQ

Cloud & DevOps: AWS, Docker, Nginx, GitHub Actions, CI/CD

Testing & Quality: pytest, Playwright, mypy, ESLint

Technical Leadership: Software architecture, technical mentorship, engineering standards, team leadership

PROFESSIONAL EXPERIENCE

Lead Software Engineer | Thoropass (formerly Laika)

January 2020 – July 2026 · Remote

Led the Compliance Data Integrations team, developing and maintaining a production platform that collected audit evidence across more than 180 integrations and 10,000 customer connection accounts.

- Designed and scaled an integration platform using Celery and RabbitMQ to support diverse integration requirements.
- Built and maintained 180+ production integrations using REST APIs and GraphQL, including integrations through Truto, Finch, and Leen.
- Contributed hands-on across the stack using Python, Django, and React while guiding technical direction and engineering initiatives.
- Led AI modernization initiatives, including an intelligent database monitoring system for error detection and remediation.
- Developed custom MCP servers enabling AI assistants to retrieve customer audit information.
- Established development standards, CI/CD pipelines, code quality practices, and technical mentorship initiatives.

Team Leader & Senior Software Developer | Snap Technology, SRL

September 2015 – January 2020 · Alajuela, Costa Rica

Led full-stack development initiatives while remaining hands-on with software development.

- Led development across multiple projects using Java, JavaScript, React, and Node.js.
- Provided technical direction and contributed to software architecture decisions.
- Established code quality practices and mentored junior engineers.

Software Developer Specialist | Accenture

October 2013 – September 2015 · Costa Rica

Developed backend solutions and enterprise applications, with a background in Java development and backend architecture.

Senior Java Developer | Credomatic

December 2008 – October 2013 · Costa Rica

Developed enterprise applications using Java, with experience in backend development, application architecture, databases, and messaging technologies.

PERSONAL PROJECTS

Goki | Full-Stack ERP & Payroll SaaS

Independent · December 2025 – Present

Designed and developed a multi-tenant ERP and payroll platform from database design through deployment, using AI-assisted software development.

- Backend and infrastructure: Python, Django, Django REST Framework, PostgreSQL, Redis, Celery, Celery Beat, REST APIs, JWT authentication, OpenAPI documentation, AWS, Docker, Nginx, and Gunicorn.
- AI integration: Anthropic Claude API and MCP server development using FastMCP; audit logging, Google OAuth, cryptography, and multi-tenant permissions.
- Frontend: TypeScript, React, Next.js, Material UI, Tailwind CSS, React Hook Form, Zod, SWR, Axios, and NextAuth.js.
- Testing and workflow: pytest, pytest-django, factory-boy, coverage, Playwright, GitHub Actions CI/CD, Claude Code, Claude Design, agentic workflows, skills, and subagents.

EDUCATION

Bachelor of Science in Computer Engineering — Universidad Latinoamericana de Ciencia y Tecnología (ULACIT)

Emphasis in Software Development — Universidad Latinoamericana de Ciencia y Tecnología (ULACIT)

Business Administration Technician — Instituto Tecnológico de Costa Rica (TEC) · 2009

CERTIFICATIONS & LANGUAGES

Oracle Certified Associate, Java SE 8 Programmer · Issued February 2020

Spanish — Native | English — Fluent
